DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Schuler (USPN 6,443,030).

Schuler discloses a vehicle steering wheel comprising: a hub (3), a steering wheel rim (5), and at least one spoke (7) having at least one spoke section, a skeleton (17) for said steering wheel rim and said spoke, said skeleton being interrupted in a radial direction between said spoke section and said steering wheel rim to define radial inner and radial outer skeleton parts separated and distanced from each other so that immediate force transmission in a radial direction within said skeleton is interrupted, and a vibration-decoupling means (21 and 23) bridging a distance between said skeleton parts and attaching said skeleton parts to each other, said vibration-decoupling means acting in all directions and at least largely isolating said steering wheel rim in terms of vibrations from said at least one section of said spoke;

said vibration-decoupling means is provided at a transition point of said spoke to said steering wheel rim;

Art Unit: 3682

said vibration-decoupling means is provided inside said spoke and separates spoke sections from each other in terms of vibrations (see fig. 5);

said vibration-decoupling means is formed by a bearing.

Allowable Subject Matter

- 3. Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 4. Claim 13 is allowed.

Response to Arguments

5. Applicant's arguments filed April 26, 2004 have been fully considered, but they are not persuasive. The Schuler reference reads on the claims as amended. In Fig. 5 of Schuler, the legs of the U-shaped skeleton 21 are interrupted by the additional mass 23 in a radial direction. At the intersection of the U-shaped portion 21 and the spoke 7, the innermost leg of the U-shaped skeleton acts as a skeleton for the spoke 7, and the outermost leg of the U-shaped portion acts as the skeleton for the rim. The skeletons are interrupted radially relative to the hub and the rim at the intersection shown in Fig. 5.

Conclusion

6. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE

MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 3682

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bradley J Van Pelt whose telephone number is 703.305.8176. The examiner can normally be reached on M-Th 7:00-4:30, 2nd F 7:00-3:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David A Bucci can be reached on 703.308.3668. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
